

Project Leadership

This management programme is designed for project managers of all disciplines, beginners and experienced alike. You will learn about the project management system - Business Excellence Model (BEM) and how to implement it in your company's environment. You will improve your knowledge and skills necessary for project management, due to the fact that it is an open program, you will be able to exchange experiences with other participants-project managers. The Business Excellence Model you will learn about in the programme will help you put the skills and knowledge acquired from the programme into practice through project plans.

Programme Objectives

- Introduce project managers to the project management system - the Business Excellence Model.
- Go through the key activities of project management and learn about the structure of project management.
- Learn how you can create a project management system and implement it.
- Become familiar with the approach to project planning and managing people during projects.
- Get to know the environment (software) in which the project management system - MBE works.
